

(a) Reactive Guard (Traditional)

Risk is **detected at or after** the harmful action.

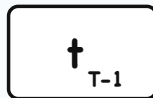

late
Start

Execution steps

...

...

Detect risk too late (after harm already happens)

Unsafe Action
(Executed)

(b) Predictive Guard (Ours)

Risk is **anticipated early** and **prevented** before harmful actions.

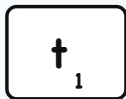

early

Flag risk early

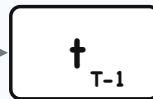

Execution steps

...

...

→

Prevent harm on time (before harmful action executes)

Unsafe Action
(Prevented)
